4	Sprint 2	30 mins
----------	----------	---------

5	Sprint 3	30 mins
----------	----------	---------

6	Q&A and Wrap-up	15 mins
----------	-----------------	---------

Navigate the RISE with SAP Methodology leveraging the integrated toolchain

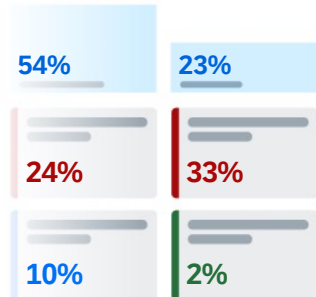

Business Transformation Management

Challenges before, during and after go-live of an SAP S/4HANA project

Get to a decision

- How can we set up our transformation objectives?
- How can we transition? What to keep, what to change?
- How can we secure management buy-in?

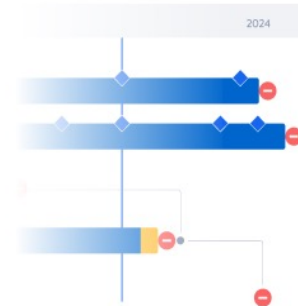

Faster
**path to
transformation
decision**

Overcome uncertainty and build your transformation **value case**

Execute successfully

- How can I prioritize my limited resources?
- How can we avoid unwanted surprises?
- How can we involve and convince stakeholders to change?

Safer
**path to
go-live**

Plan **with confidence** and implement **with less risk**

Secure agility and smooth operations

- How do we ensure adoption?
- How do we avoid disruptions?
- How do we continuously realize incremental value?

Smoother
**path to
continuous value**

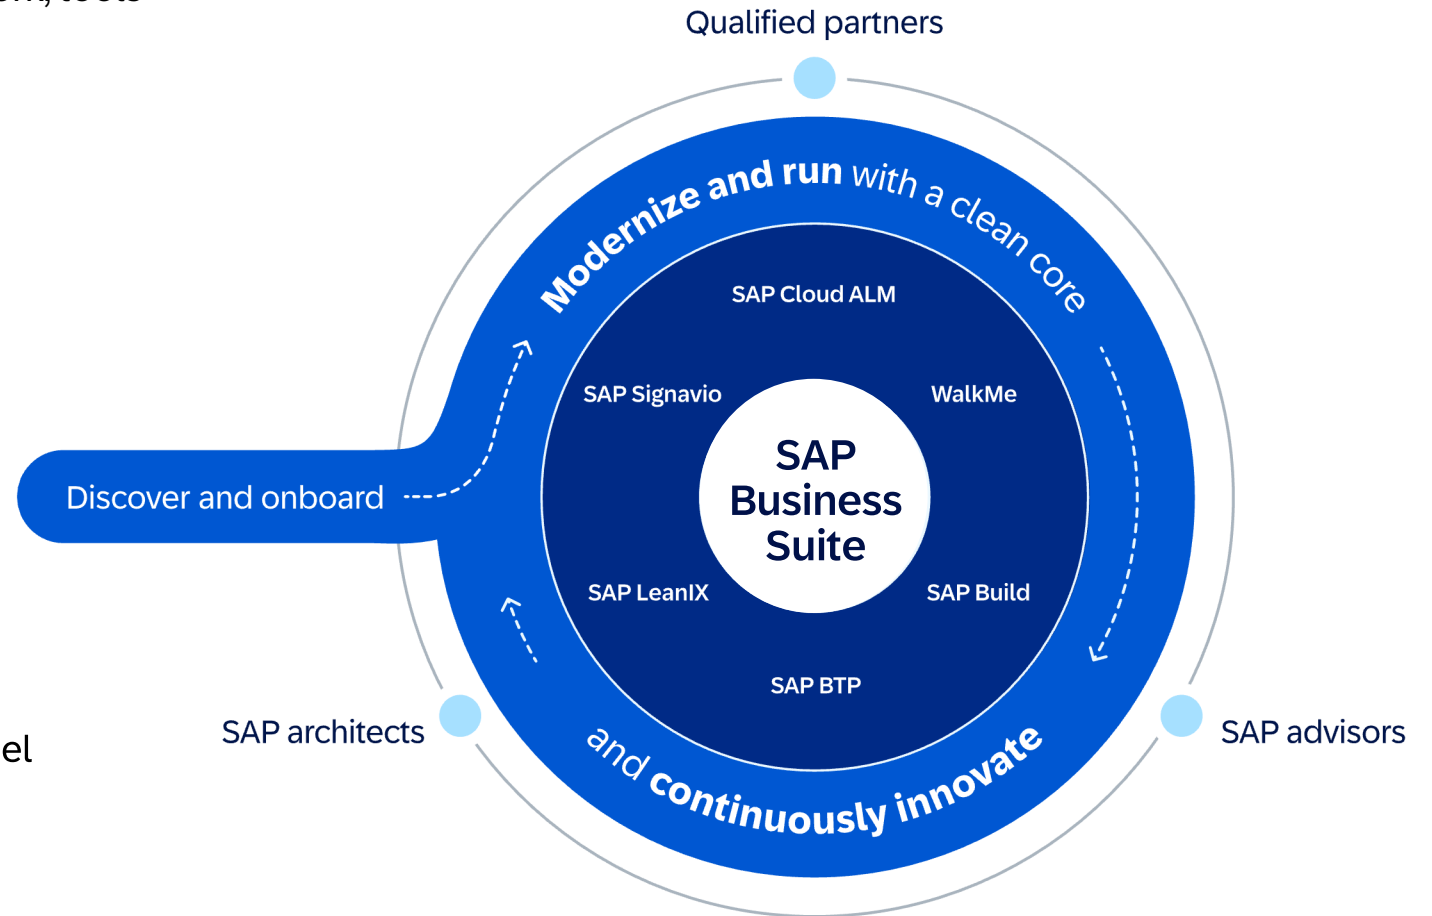

Roll-out faster and more **efficiently**, while **tracking value realization**

RISE with SAP Methodology

A proven methodology with a standardized framework, tools and expert guidance for a seamless transformation

Transformation and continuous innovation at your own pace

- Standardized framework to accelerate adoption of SAP Business suite
- Leveraging an integrated toolchain
- Guided through an end-to-end engagement model
- Tailored transformation roadmap

Integrated Toolchain

Different components for successful transformation

Enterprise Architecture Management

Strategy and Transformation
Business Architecture
Application and Data Architecture
Technical Architecture

- ✓ Optimized IT costs
- ✓ Improved security
- ✓ Increased efficiency
- ✓ Enhanced IT sustainability

Solution Transformation

Design Solution
Build Solution
Test Solution
Deploy Solution

- ✓ Reduce solution TCO
- ✓ Instantaneously available
- ✓ Supports Cloud & Hybrid
- ✓ Included in subscription

Business Process Management

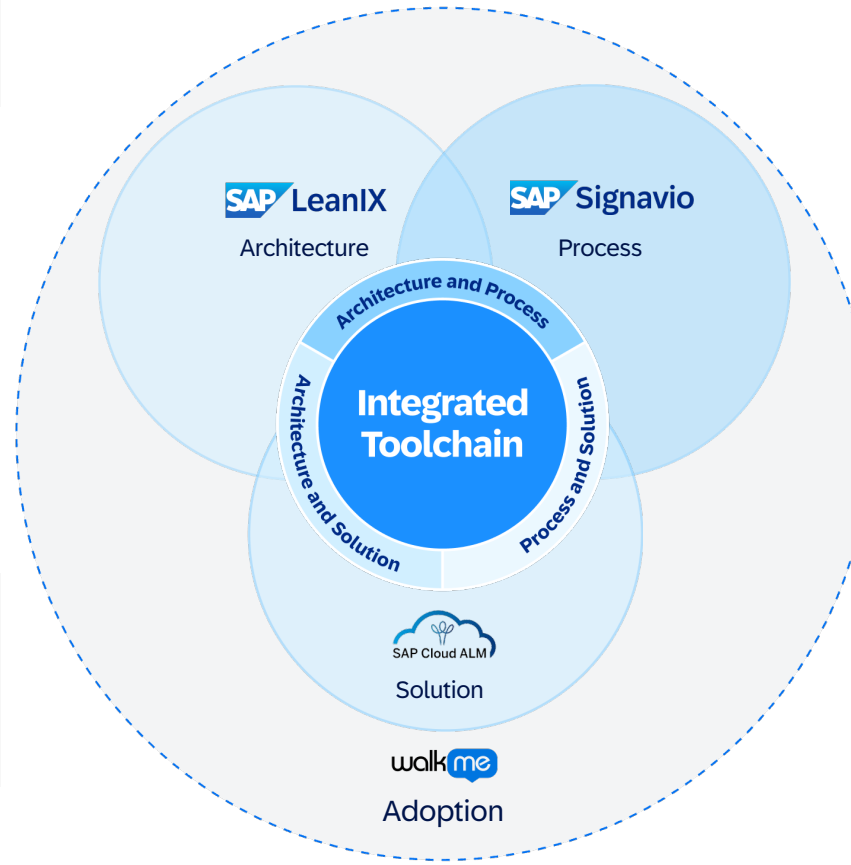

Process Analysis and Mining
Process & Journey Modeling
Process Collaboration and Governance

- ✓ Achieve transparency
- ✓ Streamline Collaboration
- ✓ Improve performance
- ✓ Accelerate time to value

Digital Adoption

Digital Transformation
Onboarding and Training
Employee Productivity

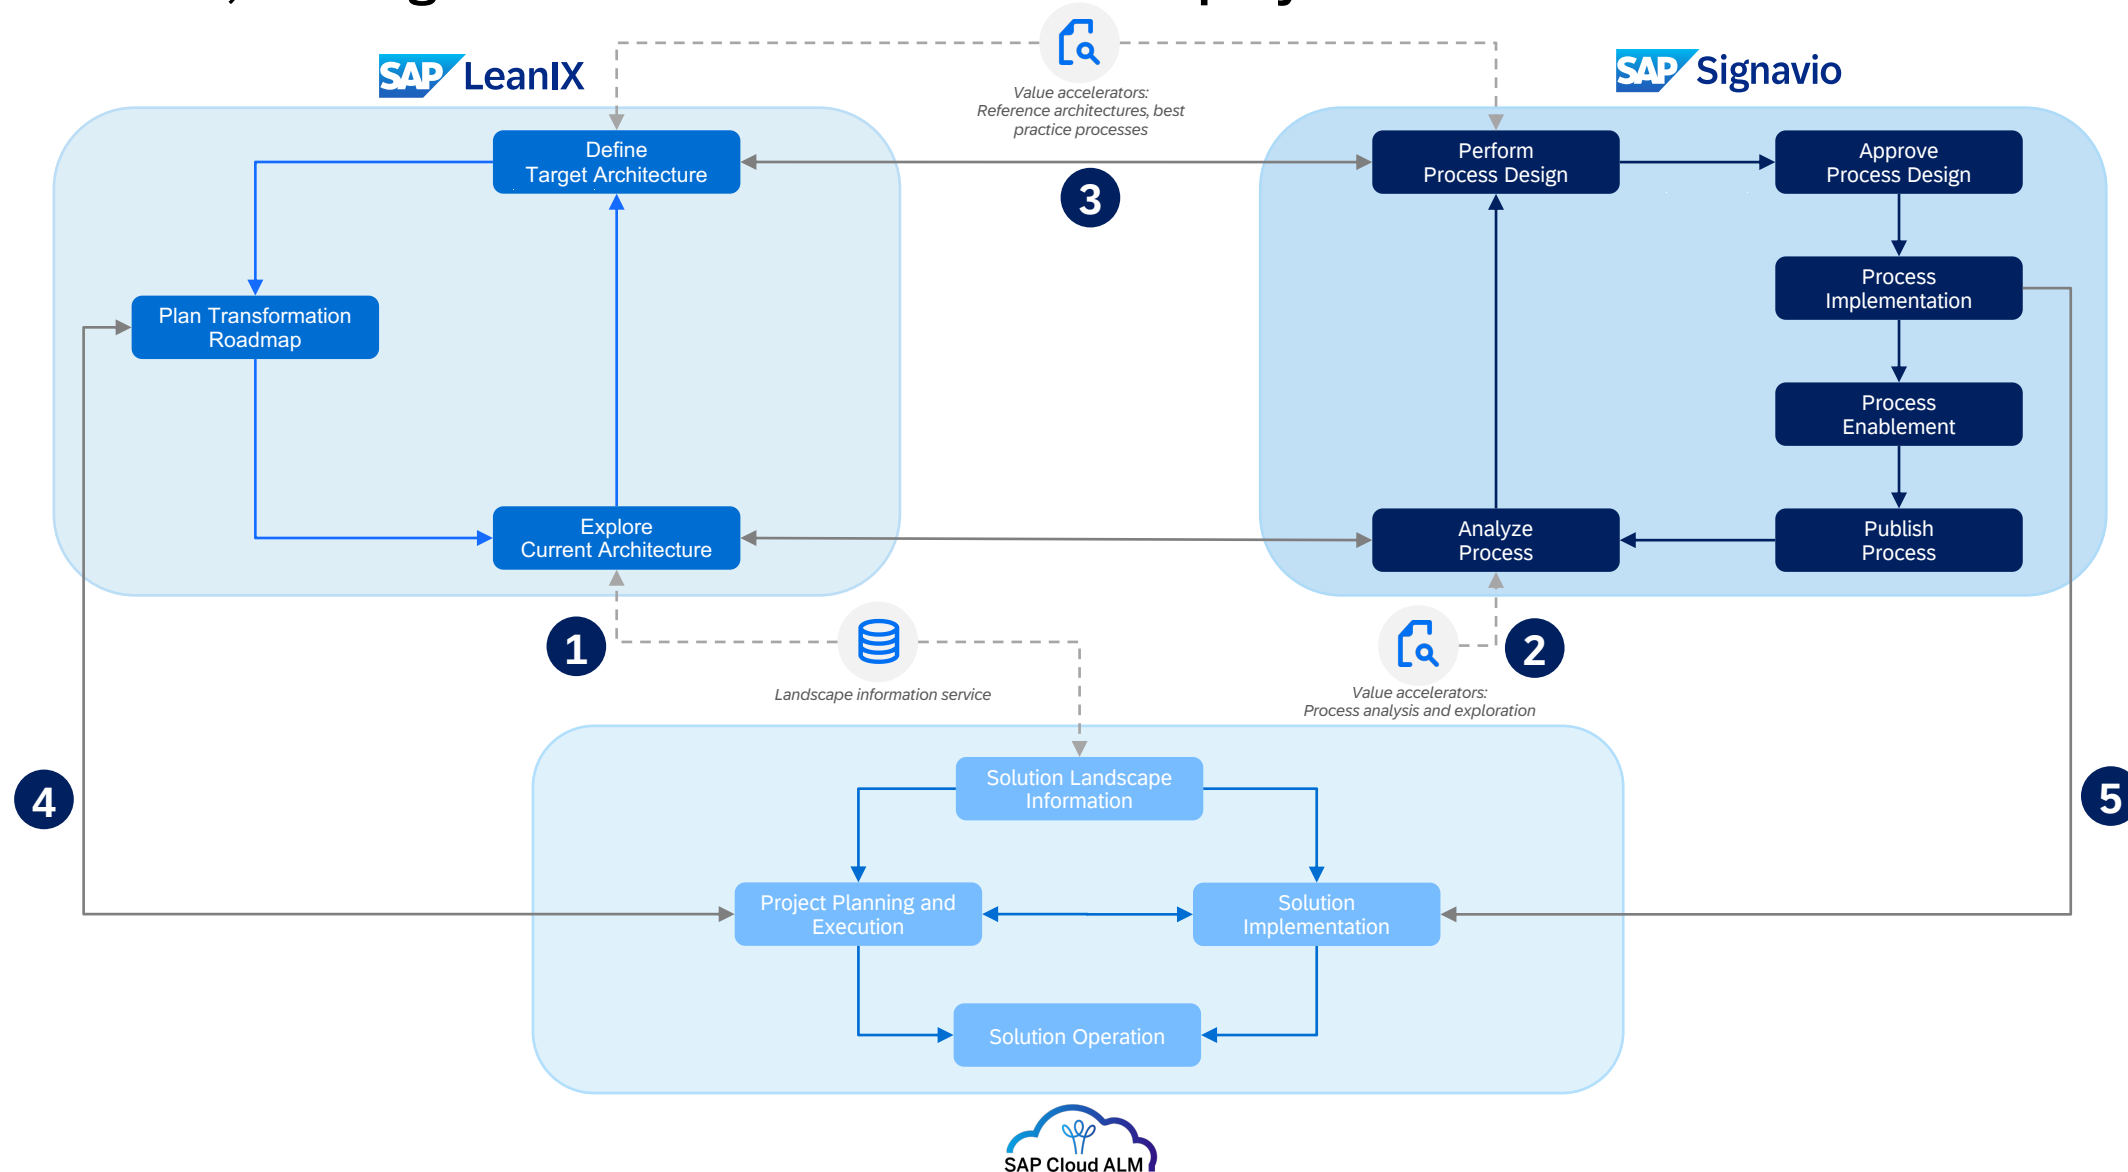

- ✓ Increased productivity
- ✓ Reduced compliance risk
- ✓ Time to value on software
- ✓ Improved business agility

Integration into SAP transformation methodology in progress

Integrated toolchain

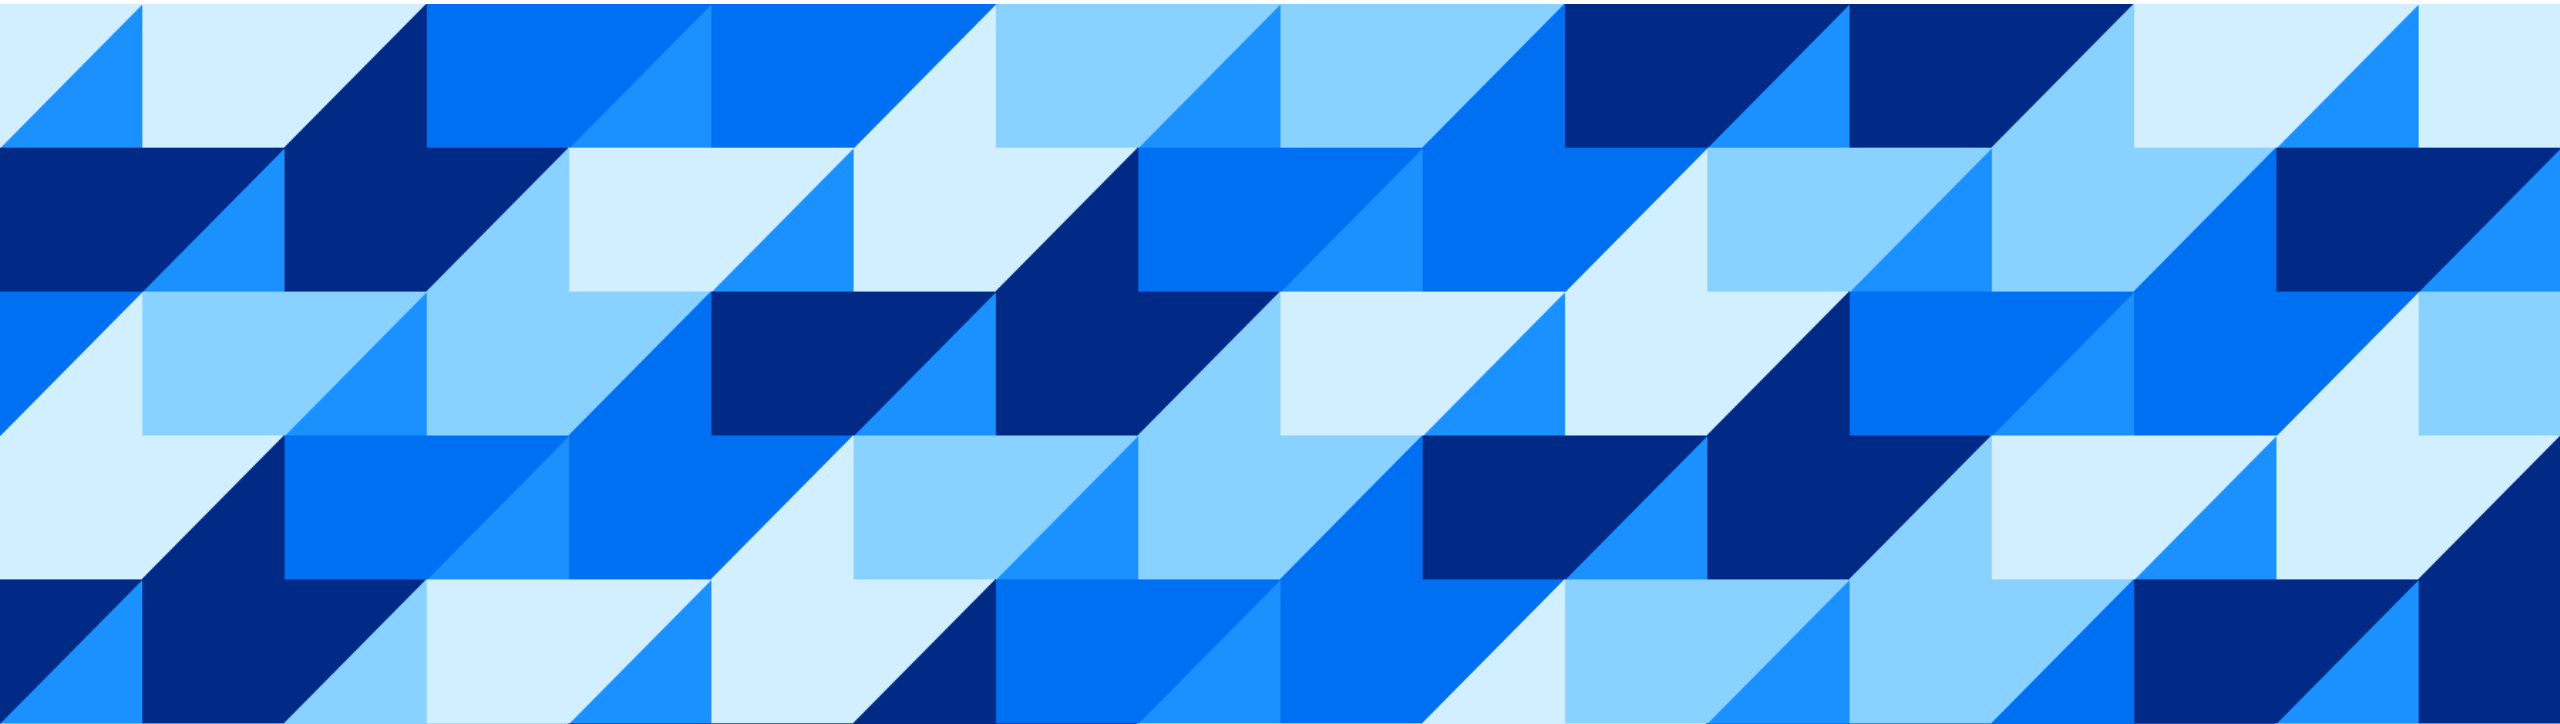

SAP LeanIX, SAP Signavio and SAP Cloud ALM interplay

Demo

Introduction of N3C Case Study

N3C Goal and Objective for this Case Study

Reduce operational costs by 10% by optimizing key processes and ERP systems in the next 3 years under the **ERP transformation program "FitForFuture"**

The management board has hired you as **Transformation consultants** to support on the FitForFuture program. During the pre-assessment the company has already identified **Procurement** as focus area for the first project wave.

Key Personas you will interact with

Business Process Manager:

- Responsible for process house in Signavio
- Wants to identify improvement potential for procurement processes

Enterprise Architect

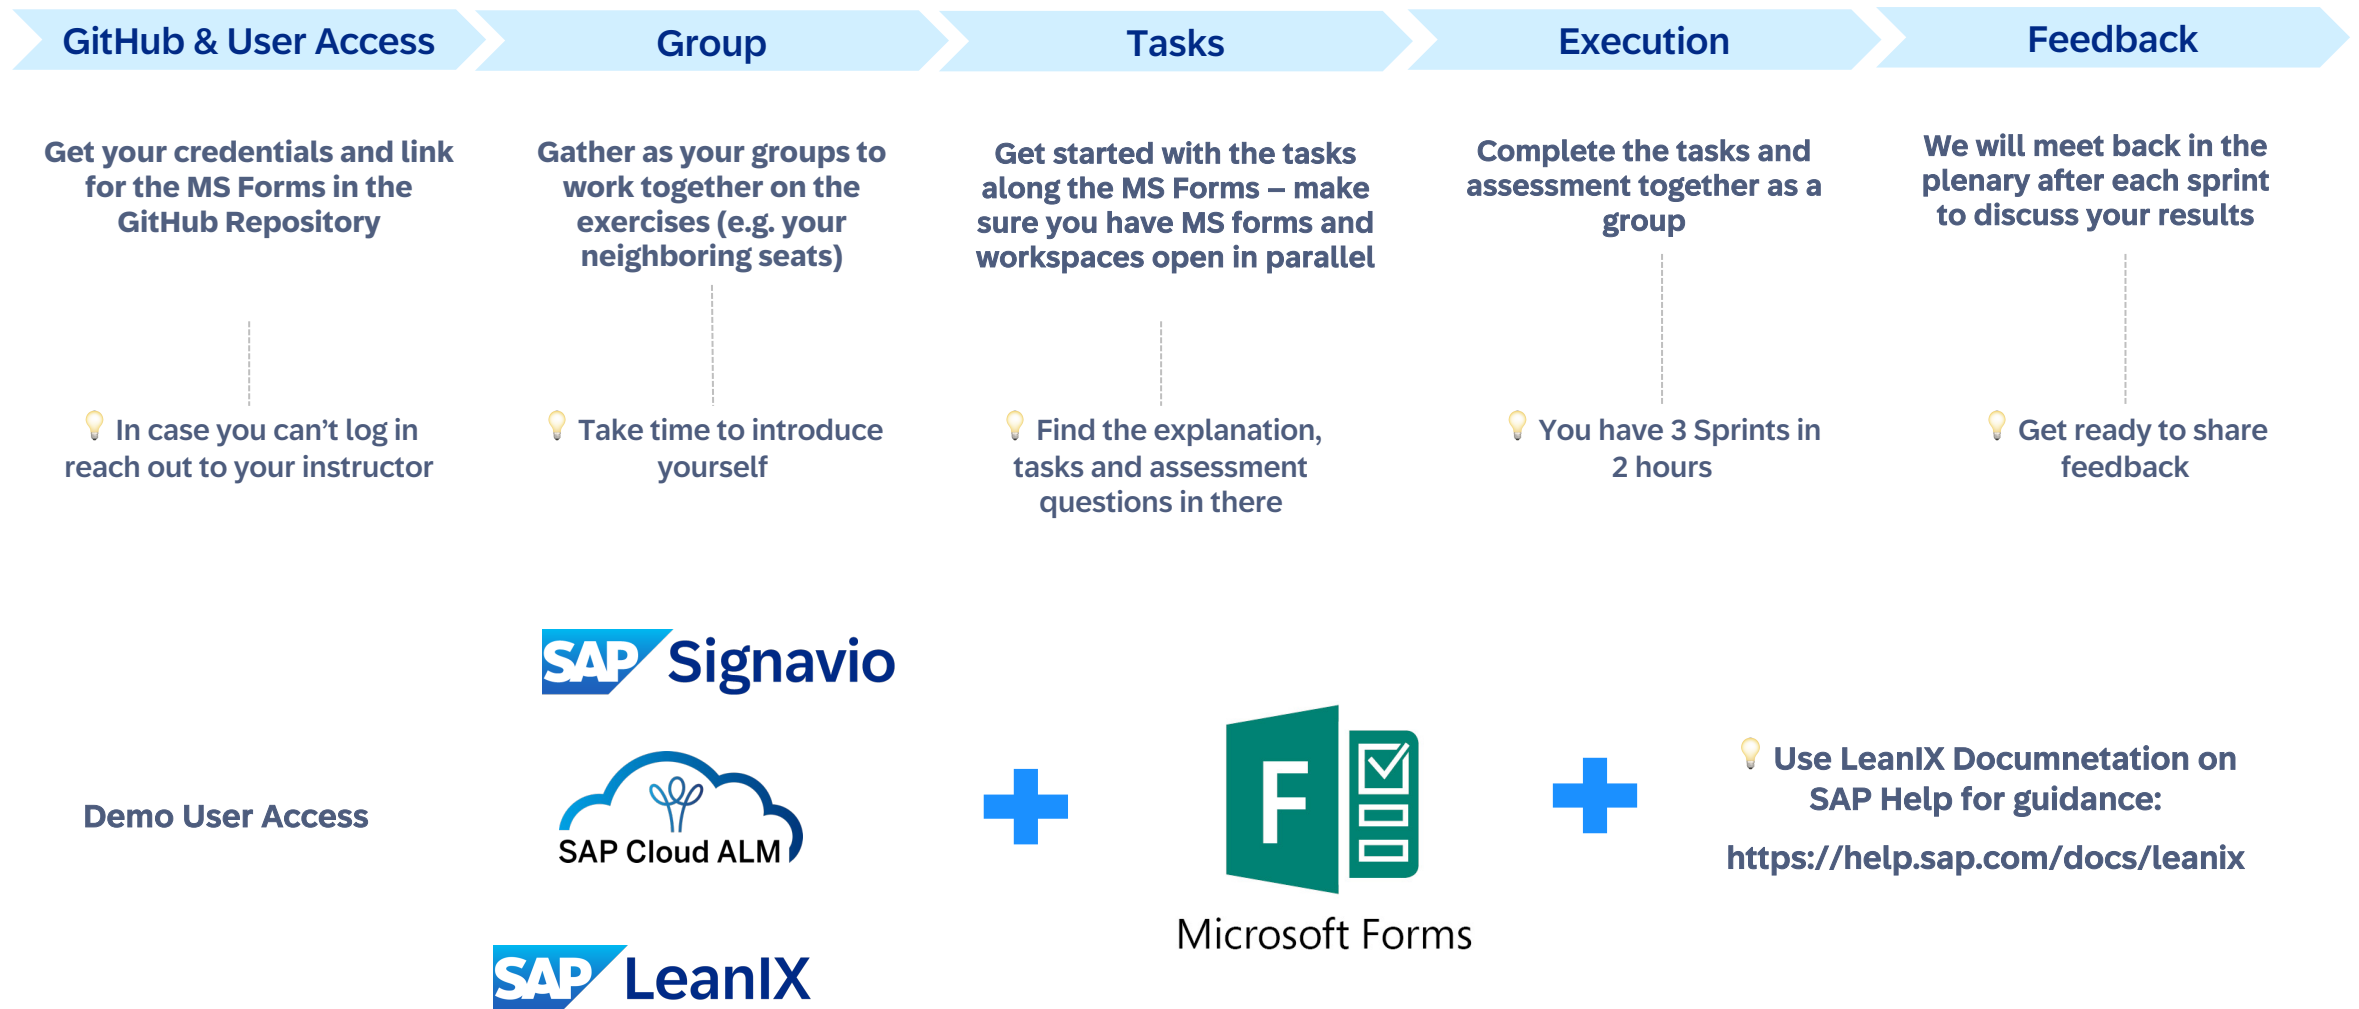

- Responsible for IT architecture incl. current as-is portfolio management and target planning
- Needs to understand interdependencies and changes in architecture during transformation

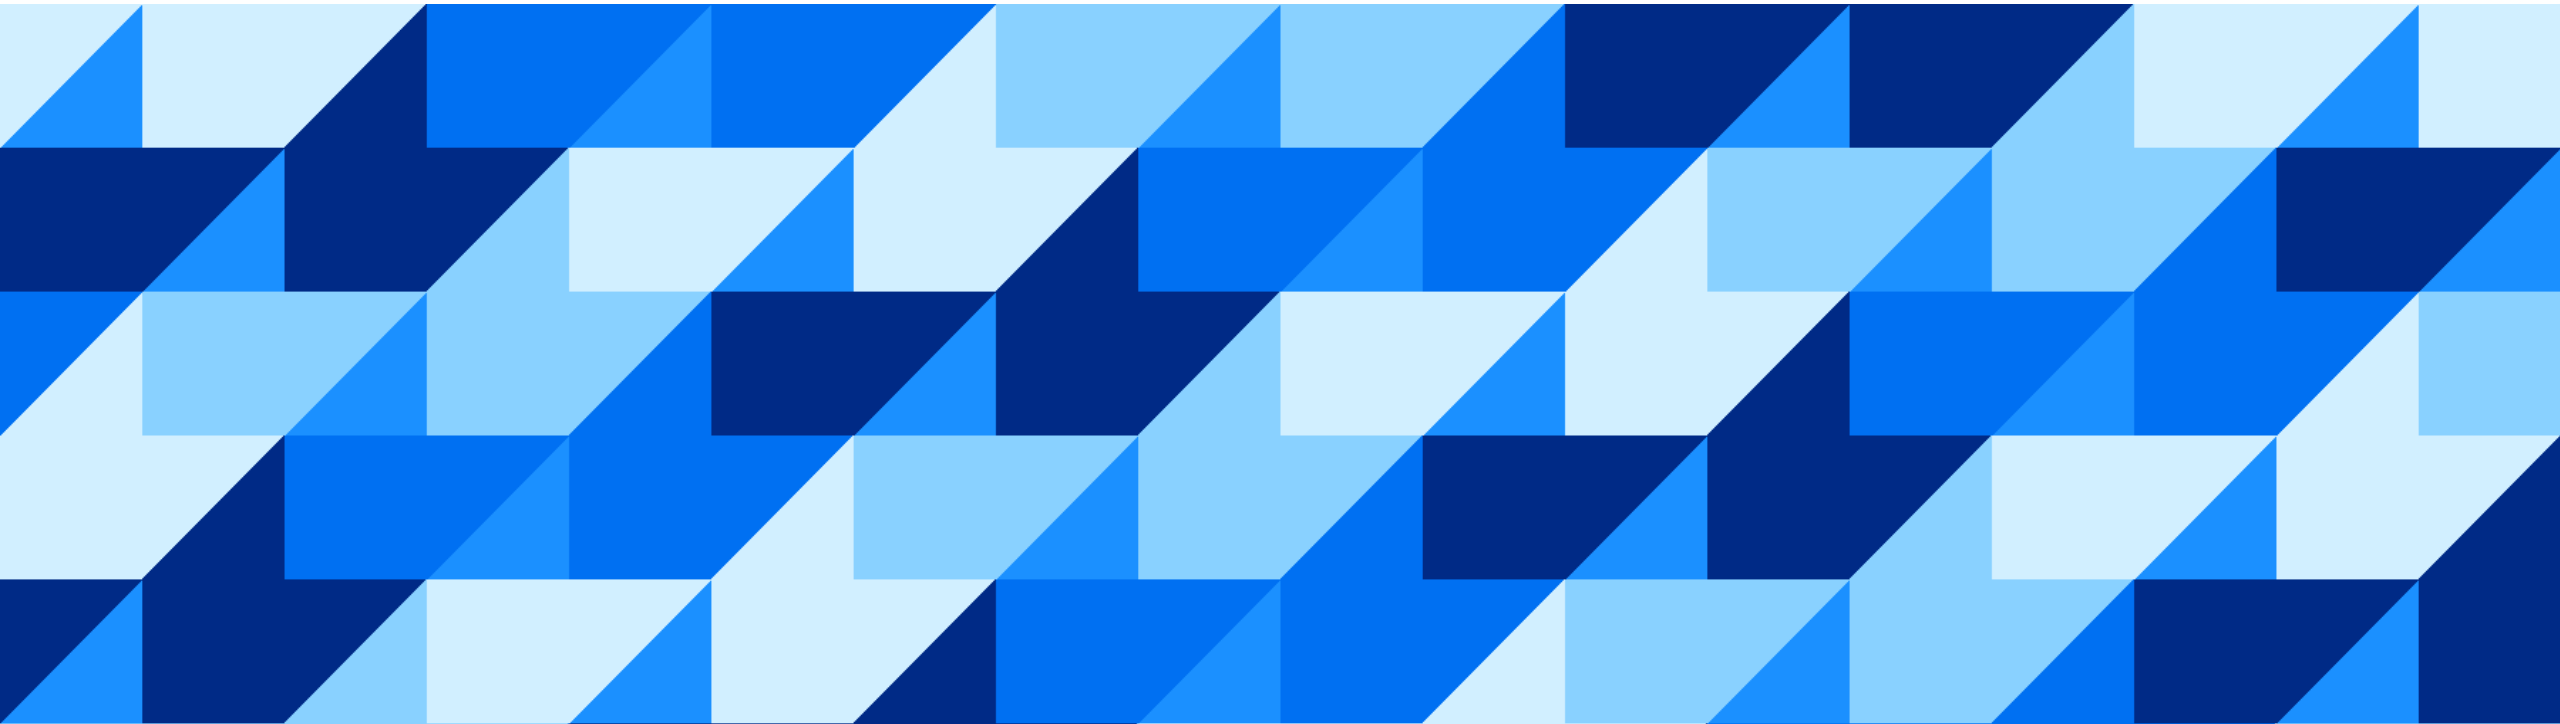

IT project manager

- Responsible for IT implementation of new target processes or applications/solutions
- Makes detailed design and testing of solutions, runs testing and documentation before publishing

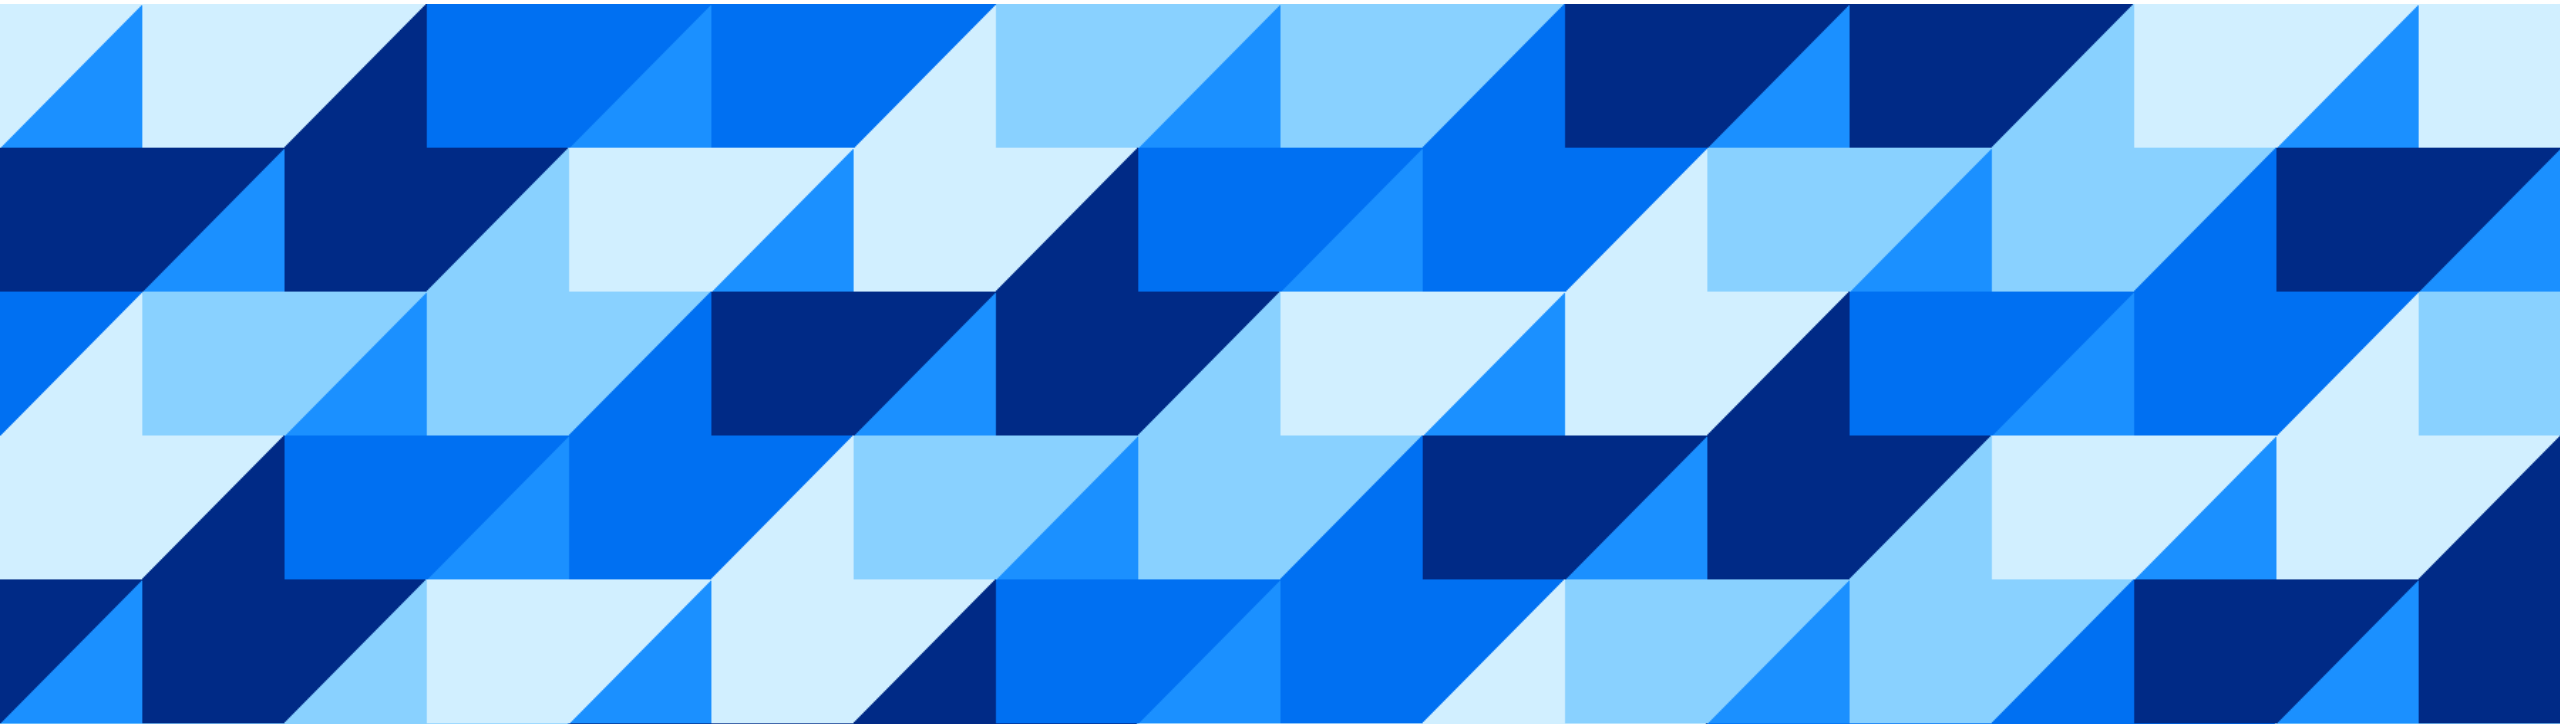

Group work set up and navigation

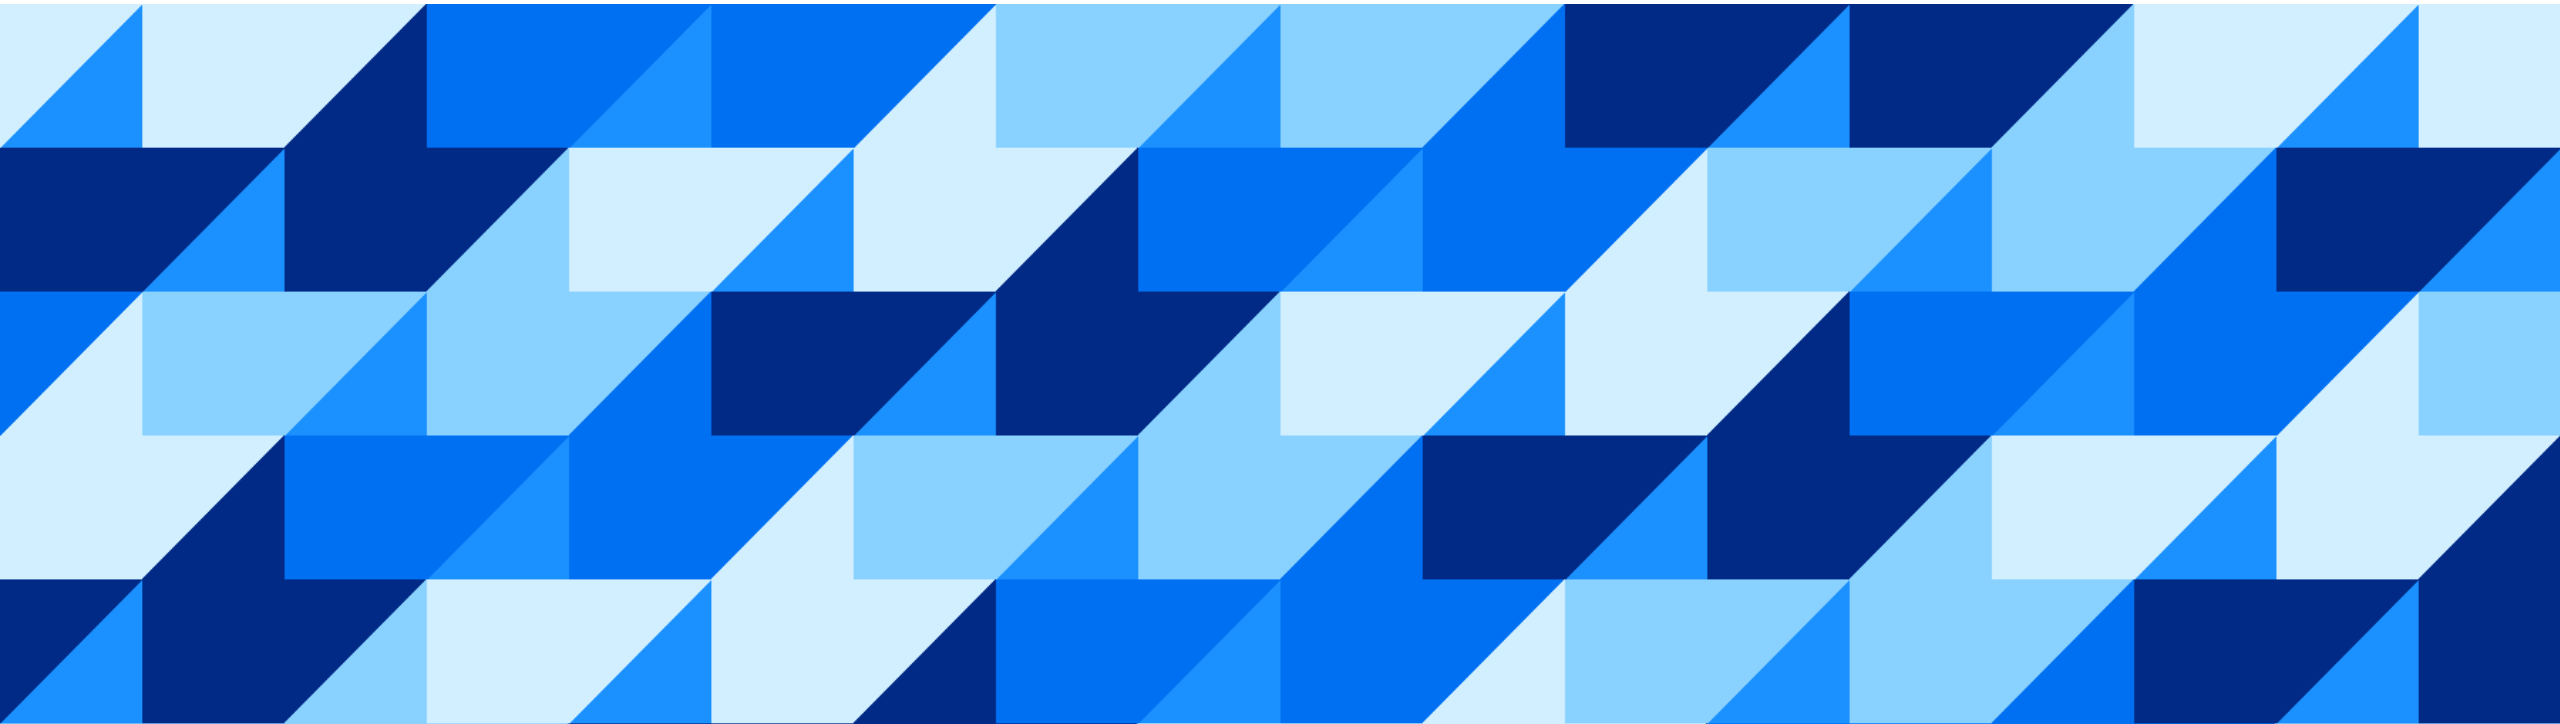

Group work - Sprint 1: Discover

Group work - Sprint 2: Prepare

Group work - Sprint 3: Explore & Run

Q & A

Thank you.
